ROBINHOOD JUNIPER

We consider this tree one of the most valuable introductions in recent years. A narrow pyramid covered with rather fine, dense, dark green foliage, that requires no trimming and keeps its rich color during all seasons.

Since its introduction several years ago, JUNIPER ROBINHOOD has become increasingly popular because of its spectacular form and rapid growth. The tree used in the picture on this page is the original specimen growing in our display grounds at 48th and "O" streets. It is extremely hardy, having suffered no ill effects from either the drought years of 1930-1935 or the severe winter of 1940.

NEBRASKA NURSERIES SPECIMEN EVERGREENS

FIR

CONCOLOR. Exceptionally fine tree to withstand heat and drought. Has silvery toned foliage, dull pointed needles, soft to touch.

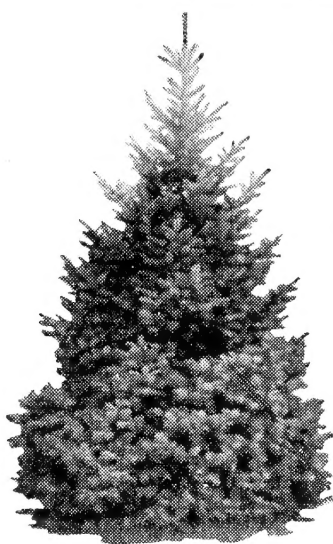

SPRUCE

BLACK HILLS. Hardest of the Spruces. Slow grower. Good lawn tree, with dark green foliage.

COLORADO BLUE (Selected Blue). Most popular of the so-called Blue Spruces. Like many highly colored Evergreens, this bluish color is a bloom or sheen—a sort of powdery substance on the outside of the needles; therefore, it is most pronounced after the new growth appears and throughout the summer. See picture.

COLORADO GREEN. Same as above, except that it has a greenish sheen instead of the blue.

KOSTER and MOERHEIM BLUE. The aristocrats of the Evergreens. The bright intense blue needles are longer than those of the Colorado Blue.

Concolor Fir

JUNIPERS

ANDORRA. See picture. Low, spreading plants with grayish green foliage that reach about 15 inches in height. Its main distinction is the unusual pinkish coloring of the foliage when the frost comes in the fall.

HORIZONTALIS. Very good ground cover. The foliage very dense and of a fresh gray-green color. See picture.

PFITZER. See picture. An excellent tree for foundation plantings, borders and in front of larger Evergreens. It will stand considerable shade, making it of use on the north side of the buildings where many varieties are not satisfactory.

SAVIN. See picture. The old familiar, low, many-branched shrub.

VIRGINIANA (Red Cedar). See picture. This variety is well known throughout the country. Dense and columnar, with bluish green foliage turning to a reddish purple in late fall or winter.

VON EHRON. An interesting variation of the Savin Juniper. Very compact and has an irregular low spreading form with semi-upright branches.

GRAFTED JUNIPERS

Savin Juniper

CANNART. See picture. A very desirable tree, growing in a symmetrical, pyramidal shape, well covered with dark green foliage of whip-cord form. Remains dark green winter and summer.

DUNDEE. A compact, symmetrical, pyramid-shaped tree of moderate size. Its spring and summer color is grayish green, with a slight blue cast. Winter color is a purplish plum shade.

HILL'S SILVER. Has very light, frosty blue foliage which is most pronounced during the spring and hot summer. Growth is compact and symmetrical.

PATHFINDER. This tree found favor almost instantly by reason of its outstanding silver foliage. It is upright in habit, full at the base, limbs curved

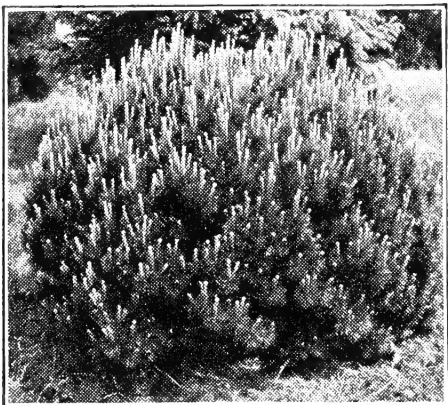

upward. Will grow about one foot a year. See picture.

STUHR'S SILVER. Another one of our introductions in recent years, this Scopulorum can be used to advantage where a slow growing Evergreen is desired.

VIRGINIANA GLAUCA. The new growth is of almost a whitish blue color. It grows quite rapidly, and is one of the few Evergreens which thrives over the entire country.

PINES

AUSTRIAN. See picture. Extra long needles of rich green, spreading branches, and handsome form.

Mugho Pine

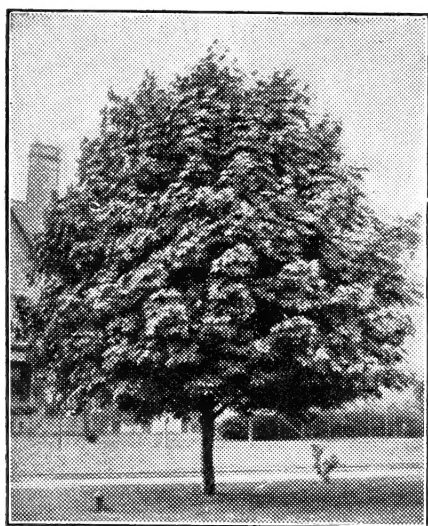

MUGHO. Very hardy, spreading dwarf, compact Pine. Fine for rockeries, foundation plantings or used in front of larger growing varieties. See picture.

PONDEROSA. Invaluable for solid backgrounds or enormous, spreading specimens on the lawn. Needles are longer than on any other Pine, extraordinarily thick, and of a rich deep green.

SCOTCH. Rapid growing, very hardy, and does well in almost any soil.

WHITE. Noted for its soft, light silvery green needles, and its graceful, majestic stature.

SHADE and ORNAMENTAL TREES

Linden

largely used trees for street planting and as a shade tree for lawns and parks.

ELM, Chinese. A fast growing, graceful, small-leaved tree with a bushy head. Very hardy, thriving under dry conditions in sandy or poor soil where most other trees fail. For a windbreak on the prairie or where a dense screen is desired, this tree has no equal.

ELM, Moline. A new pyramidal, vigorous growing variety, with large, handsome green foliage. Fine tree for street planting.

HACKBERRY. This tree resembles the American Elm in foliage and twig characteristics. The bark is ridged in an interesting manner. The Hackberry is ideally suited to boulevard and yard planting and is comparatively free from insect pests. It will grow in exposed situations and on poorer soil than many other trees.

LINDEN, American. A fine native tree, very suitable for lawn or street planting. The large leaves are heart-shaped. Fragrant, cream-white flowers are borne in May and June.

LOCUST, Thornless Honey. Handsome, rapid growing tree of open habit. Delicate fernlike foliage of bright green. Excellent for lawn or street planting. Hardy, long-lived, succeeding in almost any kind of soil.

MAGNOLIA, Soulangeana. This is the most decorative and popular of the Hardy Magnolias, producing a wealth of very large, rose colored blooms just before the leaves come in the spring. The blooms measure from 4 to 5 inches across. See picture.

MAPLE, Schwedler's. Brilliant purplish red leaves in the spring make a rich contrast with the vivid greens of surrounding nature. Gradually the highly colored foliage softens to bronze, then a little later to deep waxen green.

MAPLE, Soft. The fastest growing and largest of the Maples.

MAPLE, Sugar. Tall, stately trees of great beauty. Foliage turns to brilliant shades of yellow and orange in the fall.

MOUNTAIN ASH, European. A fine, hardy tree. The head is dense and regular, covered with a mass of white flowers in June, followed by yellow berries which turn bright scarlet.

OAK, Pin. Tall, pyramidal shape. Foliage glossy green, becoming brilliantly colored in the fall.

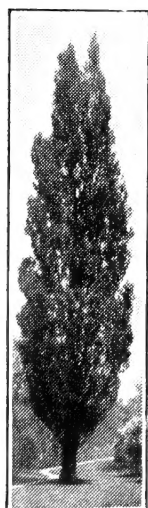

OAK, Red. Handsome Oak of open growth and rounding head. Large, glossy dark green leaves turn to vivid scarlet hues in the fall. Wonderful tree for lawn and street planting.

PLUM, Purple Leaf. Rich, purple-red foliage all summer.

POPLAR, Lombardy. Our biggest selling shade tree. Tall, slim pyramid, branching from the ground—the most striking formal tree for the landscape. Most effective in groups of 3 and 5 or in rows 2 to 5 feet apart.

REDBUD. See picture.

WALNUT, Black. Well known and valuable timber tree. Develops a stately, spreading head, grows rapidly and produces large crops of nuts.

Lombardy Poplar

WILLOW, Golden Weeping. Light green leaves, golden yellow bark.

EVERBLOOMING ROSES

AUTUMN. An exceptionally vigorous, upright grower; long, strong stems, very double blooms of rich burnt orange, yellow and red.

BETTY UPRICHARD. Lasting blooms of brilliant orange-carmine on outer surface of petals, soft pink inside; a profuse bloomer.

CALEDONIA. One of the best whites; long buds, large, double, lasting blooms.

CYNTHIA. Perfectly formed buds of brilliant orange-red on vigorous plants.

CHRISTOPHER STONE. Fragrant, velvety textured, free blooming. It is the best of the new red Roses.

CONDESA DE SASTAGO. Two-toned blossoms on vigorous, bushy plants; petals are deep coppery pink inside, golden yellow reverse.

DAINTY BESS. Vigorous plants bear large clusters of waxy petaled rose-pink blooms with wine-red stamens. Single.

DAME EDITH HELEN. Extremely double, glowing pink; excellent shape.

DUQUESA DE PENARANDA. Apricot-orange and pink. A robust plant with beautiful foliage, blooming continually.

EDITOR McFARLAND. Shapely buds and double brilliant pink blooms. Strong plants with good foliage.

EDITH NELLIE PERKINS. Delicate colors blended in beautifully formed blooms of light pink outside, soft creamy pink inside. Very vigorous.

E. G. HILL. Large, double, lasting, deep scarlet blooms on vigorous plants.

ETOILE DE HOLLANDE. Dark velvety red; large, fragrant blooms.

FRAU KARL DRUSCHKI. A Hybrid Perpetual. Immense, lasting blooms of snow-white.

GLOWING CARMINE. Carmine-pink; strong grower; blooms freely.

GOLDEN RAPTURE. Long lasting, beautifully formed buds of rich yellow.

GRENOBLE. Becoming deservedly popular because of its profusion of long-stemmed, beautifully shaped blooms of scarlet-crimson.

GRUSS AN TEPLITZ. Intensely fragrant, dark velvety scarlet blooms. An ideal bedding variety because of its continual bloom.

HEINRICH WENDLAND. Distinctly two-toned, large, double blooms. Inside of petals are nasturtium-red, reverse golden yellow.

K. A. VICTORIA. Ivory-white, double, high-centered blooms.

McGREDY'S IVORY. Large, well shaped, fragrant creamy white blooms.

McGREDY'S SCARLET. Beautifully formed, high-centered blooms of brilliant scarlet shaded rose-pink; a vigorous grower, long stems.

MARGARET McGREDY. Full blooms of deep rose produced on vigorous bushes.

MISS ROWENA THOM. Immense, bright pink blooms shaded salmon at the base. A good grower and profuse bloomer.

MME. JOSEPH PERRAUD. Shell-pink at the edges to buff and orange in the center.

MRS. E. P. THOM. Profuse, strong, bushy plants. Double, pure yellow blooms.

MRS. HENRY BOWLES. Lasting, high-centered flowers of rosy pink shaded salmon; a continuous bloomer.

PHYLLIS GOLD. Large, buttercup-yellow Rose of fine substance.

PINK RADIANCE. Free flowering, vigorous grower; rosy opaline-pink.

PRESIDENT HERBERT HOOVER. Long stems on vigorous plants; extremely large double blooms of creamy yellow tinted with flame-pink.

PRESIDENT PLUMECOCQ. Large, cupped blooms of lasting, soft coppery yellow and salmon; vigorous, upright grower, and profuse bloomer.

RED RADIANCE. A vigorous, glowing crimson sport of Radiance.

SISTER THERESE. Vigorous upright plants that bloom profusely. High-centered blooms of rich yellow.

SOUTHPORT. A brilliant, unshaded scarlet Rose, with fine Tea scent.

POLYANTHA ROSES

ELSE POULSEN. Tall grower, continuous bloomer, semi-double flowers of two-tone pink.

FOLKESTONE. Semi-double blooms of crimson-scarlet in clusters. Bushy, dwarf, spreading.

GOLDEN SALMON. Large clusters of bright salmon-orange. See picture.

HARDY FLOWERING SHRUBS

Spirea Froebeli

ALMOND, Pink. An early flowering shrub with beautiful roselike flowers, which are double and cover the shrub.

ALTHEA Rosea. This old favorite is of never-failing beauty and usefulness, for it blooms in late August when few other flowers are available.

BARBERRY, Red-Leaved. Easily grown and gives best results in the sun as the sun brings out the color of the foliage. Bright red berries hang on the twigs all winter.

BARBERRY, Thunbergi. Green-leaved. One of the most popular shrubs for border and foundation planting. Leaves turn to brilliant shades in the fall, with red berries in the winter.

FORSYTHIA (Golden Bell). Upright grower, with clusters of golden yellow blossoms on arched branches.

HONEYSUCKLE, Zabel's. We have searched for years for a true red Honeysuckle. We have this in Zabel's. These Honeysuckles have bloomed on our place now for two seasons and we can assure our customers that it is a true red (not pink) Honeysuckle.

HIGHBUSH CRANBERRY. A large growing shrub which very much resembles the bush of the Snowball.

HYDRANGEA A. G. (Hills of Snow). This is the early flowering Hydrangea. Comes into bloom in July and continues until frost. Large, flat, white blooms. Does well in the shade.

HYDRANGEA P. G. The large fall-blooming Hydrangea. Great panicles of bloom often 12 inches long by 8 inches in diameter come into full development in September.

LILAC, French. The most gorgeous flowers of all large blooming shrubs.

MOCK ORANGE (Philadelphus, Virginal) See picture. Semi-double. White. Everblooming. We regard it the most valuable acquisition to the flower garden of recent years.

QUINCE, FLOWERING (Cydonia Japonica). Bright scarlet flowers in April. Grows about 4 feet tall.

SNOWBALL (Viburnum Opulus Sterile). Well known popular shrub. Large balls of white flowers April-May.

SNOWBERRY, White. Another good shrub. Dwarf. Can be used anywhere. Pink flowers June-July. Large, white fruit in clusters in autumn.

SPIREA Froebeli (Froebel's Spirea). Vigorous grower; dwarf. Bright pink flowers, May-June. Purplish tips in spring.

SPIREA, Van Houtte. The most popular of all the Spireas. Arching branches covered with white blossoms in spring.

TAMARIX, Silver. Feathery silver foliage, with bright rose-pink flowers in June and July. Nearly everblooming.

WEIGELA Rosea (Pink Weigela). Produces a mass of rose-pink flowers in early spring.

HARDY HEDGES

BARBERRY, Green. Too well known to require any comment. In fall its colored foliage and red berries cheer the boundaries of millions of gardens and homes.

ELM, Chinese. We know of no other plant that will produce a permanent hedge as quickly as Chinese Elm.

LILAC, Persian. Sometimes called Chinese Lilac. It grows to a height of 10 to 12 feet. Various shades of lavender and purple blossoms literally cover the compact plants in April and May. This Lilac does not sprout away from the plant—the objection to the old-fashioned Lilac. Also makes a beautiful sheared hedge. See picture.

POPLAR, Lombardy. A unique and beautiful living green wall can be created by planting Lombardy Poplars one foot apart, and cutting the tops off straight like a hedge. Makes a solid wall through which no animal can crawl.

PRIVET, Amur River. This plant has been used for hedges to a tremendous extent in the past few years and has given general satisfaction. Perfectly hardy

PRIVET, Thompson's. This very hardy Privet is an improved variety of the Hardy Russian Privet having rich, glossy green leaves on an unusually bushy plant. It is becoming more popular for hedge planting each year. Almost evergreen.

PERENNIALS

Shasta Daisies

ALYSSUM, Basket of Gold.

AQUILEGIA (Columbine).
Long-Spurred Hybrids.
Mrs. Nicholls. Clear blue.

ASTER, Fall Blooming.
Violetta. Deep violet-blue.

CAMPANULA (Bellflower).
Carpatica. Dwarf Bluebell.

CHRYSANTHEMUM, Cushion.
Red, Pink, Rose, Gold, White and Bronze.

CHRYSANTHEMUM, Hardy Early Flowering
Algonquin. Clear yellow.
Autumn Lights. Coppery bronze.
Lavender Lady. Silvery lavender.
The Moor. Port-wine-red.
Little Bob. Button type; mahogany-bronze.

DELPHINIUM, Pacific Hybrids
Vetterle and Reinelt. Named varieties.

GAILLARDIA, Dazzler.

IBERIS (Candytuft).

PHLOX, Creeping and Upright.

PLATYCODON (Balloon Flower).
Early Giant Blue.

PYRETHRUM (Painted Daisy).

SHASTA DAISY.

Potted Annuals

Petunias, Asters, Snaps,
Lobelia, Marigolds, Alyssum,
Ageratum, Dwarf Dahlias,
and Salvia.

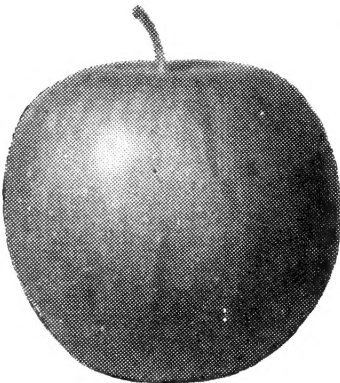

CLIMBING VINES

BITTERSWEET.

BOSTON IVY.

CLEMATIS.
Andre, Henryi, Ramona, Jackmani and B.-Veillard.
